

**Free Public Lecture – Thursday 17 August 2017 @ 6:00 pm  
in 0.03, N16, Macrossan Building Lecture Theatre**

**“Global Expansion of the Wireless: The 5G dive into the great unknown”**

The lecture is hosted by the **Centre for Environment and Population Health (CEPH)** Menzies Health Institute Queensland, Griffith University, and supported by:

- **Australasian Radiation Protection Society (ARPS arps.org.au)**
- **Australian Institute of Occupational Hygienists (AIOH aioh.org.au)**
- **Oceania Radiofrequency Scientific Advisory Association (ORSAA, orsaa.org)**

There are increasing concerns that the 5th generation mobile networks “5G” may have undiscovered health effects. The technology will be pervasive. An acknowledged expert in the field, Prof. Dariusz Leszczynski from Finland will share his concerns.

Prof. Leszczynski, PhD, DSc is Adjunct Professor of Biochemistry at the University of Helsinki, Finland and Chief Editor of ‘Radiation and Health’; specialty of the ‘Frontiers in Public Health’, an open-access journal published in Lausanne, Switzerland.

He has doctorates in both molecular biology and biochemistry and for nearly 22 years (1992-2013) he worked at the Finnish Radiation and Nuclear Safety Authority. Before that he worked as the Head of Radiation Biology Laboratory and was appointed Research Professor in 2000 Research Professor. Dr Leszczynski was one of the 30 international experts invited by the WHO’s International Agency for Research on Cancer (IARC) in 2011 to evaluate the cancer risk of radiofrequency electromagnetic radiation (wireless radiation) which was classified as a **2B possible human carcinogen**. He is visiting Australia on the invitation of the Australasian Radiation Protection Society as a keynote speaker at their annual conference.

His full CV and list of publications are available on his science blog: BRHP – Between a Rock and a Hard Place [betweenrockandhardplace.wordpress.com](http://betweenrockandhardplace.wordpress.com)

**RSVP for Parking Instructions** – there are only 100 seats in the lecture theatre <http://griffithunievent.weebly.com>

**Tea and Coffee** will follow the lecture (courtesy AIOH).

Public Transport to Griffith University, Nathan Campus is excellent.

---

**Location:** Griffith University, **Nathan Campus**, Macrossan Building (N16)  
Lecture Theatre No. 0.03. **Parking code and location are in the reply to your RSVP**
