

Radiation Protection in 2020: Changes and Challenges

1 – 2 October 2020, Sage Hotel, Adelaide

The disruption that has marked 2020 has raised the importance of local professional development activities.

A two-day symposium is planned for people from all disciplines who have an interest in the safe use of radiation.

Speaker Information

The program will be finalised and speakers notified by the end of August.

To manage the risk that the Symposium may be affected by social distancing requirements, speakers may be asked to pre-record their presentations and prepare an extended abstract. Presentations may be recorded and shared via the internet.

Full details will be communicated to registered attendees as they are finalised.
